1. Goals, objectives and planned learning outcomes in the discipline

Goals mastering the discipline "Philosophy" are:

- ensuring that students master the basics of philosophical knowledge;
- formation of an idea about the specifics of philosophy as a way of knowing and spiritually mastering the world, the main sections of modern philosophical knowledge, philosophical problems and methods for their study;
- developing skills for independent analysis of the meaning and essence of the problems that occupied the minds of philosophers of the past and present, as well as the current state of society in its socio-historical and ethical contexts.

To the main tasks mastering the discipline "Philosophy" should include:

- mastering the basic principles and techniques of philosophical knowledge;
- awareness of the system of universal values, understanding of the importance for the development of civilizations of historical heritage and socio-cultural traditions of various social groups, ethnic groups and confessions, as well as world religions, philosophical and ethical teachings
- developing the skills of critical perception and evaluation of information sources, the ability to logically formulate, present and reasonably defend one's own vision of problems and ways to solve them;
- mastering the methods of conducting discussions, polemics, dialogue
- acquisition of skills of interaction with people, taking into account socio-cultural characteristics in order to successfully complete professional tasks and social integration

Learning outcomes by discipline are as follows:

- possession of the basic principles and methods of philosophical knowledge;
- understanding of the intercultural diversity of society in the socio-historical, ethical and philosophical contexts
- awareness of the system of universal values, understanding of the importance for the development of civilizations of historical heritage and socio-cultural traditions of various social groups, ethnic groups and confessions, as well as world religions, philosophical and ethical teachings
- skills of critical perception and evaluation of sources of information, the ability to logically formulate, present and reasonably defend their own vision of problems and ways to solve them;
- possession of methods of conducting discussion, polemics, dialogue
- skills of interaction with people, taking into account socio-cultural characteristics in order to successfully complete professional tasks and social integration

Training in the discipline "Philosophy" is aimed at developing the following competencies in students:

Code and name of competencies	Competence achievement indicators
UK-5. Able to perceive the intercultural diversity of society in the socio-historical, ethical and philosophical contexts	IUK-5.1. Analyzes and interprets events, the current state of society, manifestations of its intercultural diversity in socio-historical, ethical and philosophical contexts IUK-5.2. Realizes the system of universal human values, understands the importance for the development of civilizations of historical heritage and socio-cultural traditions of various social groups, ethnic groups and confessions, as well as world religions, philosophical and ethical teachings IUK-5.3. Interacts with people in a culturally sensitive manner in order to successfully complete professional tasks and social integration

2. The place of discipline in the structure of the educational program

The discipline refers to the mandatory part / part formed by the participants in the educational relations of block B1 "Disciplines (modules)".

The discipline "Philosophy" is taught in the 1st semester. The discipline "Philosophy" is connected logically and meaningfully and methodically with the following disciplines of the PLO: "History of Russia", "Digital Literacy". In the process of studying these disciplines, the main universal competencies are formed, aimed at forming a culture of philosophical thinking, the ability to analyze and synthesize. This creates the basis for the effective development of these disciplines, forms the basis of logical thinking in the student, the ability to identify patterns in the development of nature and society, forms an active and useful civic position for society. The basic knowledge that a student should have after studying the discipline "Philosophy" is designed to contribute to the development of disciplines aimed at the formation of professional knowledge and skills.

3. Structure and content of the discipline

The total labor intensity of the discipline is 2 credit(s) unit(s) (72 hours).

3.1 Types of educational work and labor intensity (according to the forms of education)

3.1.1. Half-time education

o. p / p	Type of study work	Quantity hours	Semesters	
			1	
	Auditory lessons	18	18	
	Including:			
.1	Lectures	8	8	
.2	Seminars/practical classes	10	10

3.3 The content of the discipline

Topic 1. Philosophy, its subject and place in culture.

Philosophical questions in the life of modern man. The main characteristics of philosophical knowledge. Functions of philosophy.

Topic 2. History of philosophy.

The problem of its occurrence. Philosophy of the Ancient World. Chinese and Indian philosophical schools. The specifics of ancient Greek philosophy. Greek natural philosophy. Socrates and the Socratic schools. Classical ancient philosophy: Plato's idealism and Aristotle's philosophical system. Platonists and Neoplatonists. Non-classical ancient philosophy: epicureanism, skepticism, stoicism.

Topic 3. Specificity and main problems of medieval philosophy.

Periodization of medieval philosophy. Islamic Philosophy of the Middle Ages. The main schools and representatives of Christian medieval philosophy. Mystic. Scholasticism. Thomism and Augustinianism. The Crisis of Medieval Philosophy.

Topic 4. Philosophy of the Renaissance.

Humanism and natural philosophy of the Renaissance. Pantheism, utopianism, skepticism of the late Renaissance.

Topic 5. Western European philosophy of modern times.

The emergence of modern European philosophy. Metaphysical systems of rationalism. British sensationalism and its critics. subjective idealism. Enlightenment Deism. Naturalism, empiricism and materialism in the philosophy of the Enlightenment. Spiritualism and irrationalism of the philosophy of the 18th century.

Topic 6. German classical philosophy.

Main problems: the specifics of their formulation and solution. I. Kant on the subject and method of philosophy. "Critical" period of Kant's philosophy. Ethical and aesthetic views of Kant. Philosophy of Fichte, Schelling. Dialectic of Hegel. Anthropological materialism L. Feuerbach.

Topic 7. Non-classical Western philosophy at the turn of the 19th -20th centuries.

Vulgar and anthropological materialism. Marxist philosophy and directions of its development. Positive philosophy, empirio-criticism and philosophy of science. phenomenological movement. The evolution of American pragmatism. Western European philosophy of life. Ways of conceptualization of the unconscious in psychoanalytic philosophy.

Topic 8. Western philosophy of the XX century.

Analytical Philosophy. Logical neopositivism. Linguistic Philosophy. critical rationalism. Existentialism, philosophical anthropology. Hermeneutics. Poststructuralism and postmodernism.

Topic 9. Russian philosophy.

The emergence, formation and development of philosophy in Russia. Specificity of Russian philosophy. The heyday of Russian philosophy in the XIX - XX centuries. Original Russian philosophy: the philosophy of Slavophilism, Westernism, sophiology, cosmism. Soviet and post-Soviet philosophical thought.

3.4 Topics of seminars / practical and laboratory classes

3.4.1. Seminars/practical classes

Topic 1. Philosophy, its subject and place in culture.

Philosophical questions in the life of modern man. The main characteristics of philosophical knowledge. Functions of philosophy.

Topic 2. History of philosophy.

The problem of its occurrence. Philosophy of the Ancient World. Chinese and Indian philosophical schools. The specifics of ancient Greek philosophy. Greek natural philosophy. Socrates and the Socratic schools. Classical ancient philosophy: Plato's idealism and Aristotle's philosophical system. Platonists and Neoplatonists. Non-classical ancient philosophy: epicureanism, skepticism, stoicism.

Topic 3. Specificity and main problems of medieval philosophy.

Periodization of medieval philosophy. Islamic Philosophy of the Middle Ages. The main schools and representatives of Christian medieval philosophy. Mystic. Scholasticism. Thomism and Augustinianism. The Crisis of Medieval Philosophy.

Topic 4. Philosophy of the Renaissance.

Humanism and natural philosophy of the Renaissance. Pantheism, utopianism, skepticism of the late Renaissance.

Topic 5. Western European philosophy of modern times.

The emergence of modern European philosophy. Metaphysical systems of rationalism. British sensationalism and its critics. subjective idealism. Enlightenment Deism. Naturalism, empiricism and materialism in the philosophy of the Enlightenment. Spiritualism and irrationalism of the philosophy of the 18th century.

Topic 6. German classical philosophy.

Main problems: the specifics of their formulation and solution. I. Kant on the subject and method of philosophy. "Critical" period of Kant's philosophy. Ethical and aesthetic views of Kant. Philosophy of Fichte, Schelling. Dialectic of Hegel. Anthropological materialism L. Feuerbach.

Topic 7. Non-classical Western philosophy at the turn of the 19th -20th centuries.

Vulgar and anthropological materialism. Marxist philosophy and directions of its development. Positive philosophy, empirio-criticism and philosophy of science. phenomenological movement. The evolution of American pragmatism. Western European philosophy of life. Ways of conceptualization of the unconscious in psychoanalytic philosophy.

Topic 8. Western philosophy of the XX century.

Analytical Philosophy. Logical neopositivism. Linguistic Philosophy. critical rationalism. Existentialism, philosophical anthropology. Hermeneutics. Poststructuralism and postmodernism.

Topic 9. Russian philosophy.

The emergence, formation and development of philosophy in Russia. Specificity of Russian philosophy. The heyday of Russian philosophy in the XIX - XX centuries. Original Russian philosophy: the philosophy of Slavophilism, Westernism, sophiology, cosmism. Soviet and post-Soviet philosophical thought.

3.4.2. Laboratory studies

Not provided.

3.5 Topics of course projects (term papers)

Not provided.

4. Educational, methodological and information support

4.1 Regulatory documents and GOSTs

1. https://fgosvo.ru/uploadfiles/FGOS%20VO%203++/Bak/380302B_3_31082020.pdf?ysc_lid=ljjsniy5cx508710083.

5. Logistics

Lecture audiences, audiences for seminars of the general fund, computer classes, a scientific reading room equipped with places for Internet access, electronic media for computer programs and distance learning, Notebook Lenovo 300e, interactive whiteboards Samsung UE75AU7100U (located in classrooms PC 439, 202 , 318, etc.), video projectors.

6. Guidelines

6.1 Methodological recommendations for the teacher on the organization of training

At the first lesson in the discipline, it is necessary to familiarize students with the order of its study (forms of classes, current and intermediate control), reveal the place and role of the discipline in the system of sciences, its practical significance, bring the requirements of the department (Center) to the students, answer questions.

Lecture requirements:

- scientific and informative (modern scientific level), evidence and reasoning, the presence of a sufficient number of vivid, convincing examples, facts, justifications, documents and scientific evidence;

- activating the thinking of listeners, setting questions for reflection, a clear structure and logic for the disclosure of sequentially presented questions;

- clarification of newly introduced terms and names, formulating the main thoughts and provisions, emphasizing the conclusions, repeating them;

- emotionality of the form of presentation, accessible and clear language.

The teacher should help students and make sure everyone understands and has time to follow the progress of the presentation of the material. A means to help note-taking is an accentuated presentation of the lecture material, i.e. highlighting the voice, intonation, repeating the most important, essential information, using pauses, writing on the board, demonstrating illustrative material, strict adherence to the rules of classes.

The teacher can directly supervise the work of students in taking notes of lecture material, emphasizing the need to reflect the main provisions of the topic being studied in the notes, emphasizing the categorical apparatus. The art of the lecturer helps the good organization of the work of students at the lecture. The content, the clarity of the structure of the lecture, the use of methods of maintaining attention - all this activates thinking and working capacity, helps to establish contact with the audience, evokes an emotional response in students, and forms interest in the subject.

In the final part of the lecture, it is necessary to formulate general conclusions on the topic, revealing the content of all the questions posed in the lecture. Announce the plan of the next seminar, give brief recommendations on how to prepare students for the seminar.

When preparing for a seminar on the topic of the lecture, the teacher needs to clarify the plan for its conduct, think over the wording and content of the training questions submitted for discussion, and familiarize yourself with new publications on the topic of the seminar.

During the seminar, in the introductory speech, reveal the theoretical and practical significance of the topic of the seminar, determine the order of its conduct, the time for discussing each educational issue. To give everyone the opportunity to speak, as well as to invite those students who, for one reason or another, missed the lecture or are passive to speak. During the discussion of educational issues, it is advisable to ask additional and clarifying questions to the speakers and the audience in order to clarify their positions on the merits of the issues under discussion. Encourage speaking from the floor in the form of brief additions and questions to the speaker and the facilitator. For clarity and consolidation of the studied material, the teacher can use tables, diagrams, maps.

In the final part of the seminar, one should summarize its results: evaluate the performances of each student and the study group as a whole. To reveal the positive aspects and disadvantages of the seminar. Answer students' questions. Name the topic of the next lesson.

6.2 Guidelines for students on mastering the discipline

Working with a book (textbook). When working with a book (textbook), it is necessary to study the list of literature recommended by the teacher, learn how to read it

correctly, and keep notes. The library uses alphabetical and systematic catalogs to select literature. It is important to remember that rational book handling skills are always a great time and effort saver. When studying the material from the textbook, one should proceed to the next question only after correctly understanding the previous one, describing all the calculations on paper. Particular attention should be paid to the definition of the basic concepts of the course "Philosophy". The student should analyze in detail the examples that explain such definitions, and be able to build similar examples on their own. You need to get an accurate idea of what you are studying. It is useful to make base notes.

METHODOLOGICAL RECOMMENDATIONS FOR PREPARATION OF A SUMMARY:

1. Read the text carefully. Check in the reference literature for unfamiliar words. When recording, do not forget to put reference data in the abstract margins;
2. Highlight the main thing, make a plan;
3. Briefly formulate the main provisions of the text, note the author's argument;
4. Outline the material, clearly following the points of the plan. When taking notes, try to express your thoughts in your own words. Records should be kept clear and concise.
5. Properly write down quotes. When quoting, consider the conciseness, the significance of the thought. In the text of the abstract, it is desirable to provide not only thesis provisions, but also their evidence. When compiling an abstract, it is necessary to strive for the capacity of each sentence. The thoughts of the author of the book should be stated briefly, taking care of the style and expressiveness of what is written. The number of additional elements of the abstract should be logically justified, the entries should be distributed in a certain sequence that corresponds to the logical structure of the work. For clarification and addition, it is necessary to leave the fields.

Mastering the skills of note-taking requires the student to be purposeful, everyday independent work.

ESSAY ON PHILOSOPHY. An essay is a genre of philosophical, literary-critical, historical-biographical, journalistic prose, combining the emphatically individual position of the author with a relaxed, often paradoxical presentation focused on colloquial speech.

Philosophy Essay Evaluation Criteria:

1. The clarity of the problem statement within the stated topic. Erudition: knowledge and logical presentation of factual material, familiarity with the names of famous philosophers.
2. Understanding the differences between educational, journalistic, popular science and scientific texts.
3. The ability to isolate causal relationships. Ability to analyze philosophical text.
4. Ability to formulate conclusions.
5. The manifestation of creative and independent thinking. Possessing literary skills. Style and form of presentation of the material.

The essay should have the following structure:

1. Introduction (introduction) - defines the topic of the essay and contains definitions of the main concepts encountered.
2. Content (main part) - a reasoned presentation of the main theses. The main part is built on the basis of analytical work, including the analysis of facts. The most important

philosophical concepts included in the essay are systematized and illustrated with examples. The judgments given in the essay must be conclusive.

3. Conclusion - these are the final conclusions on the topic, what the author came to as a result of reasoning. The conclusion summarizes the main ideas. The conclusion can be presented as a sum of judgments, which leave room for further discussion.

PREPARATION OF REPORTS. RULES FOR WRITING SUMMARY AND OTHER SCIENTIFIC WORKS

A report is a public communication, which is a detailed presentation of a specific topic.

Stages of report preparation:

1. Determination of the purpose of the report.
2. Selection of the necessary material that determines the content of the report.
3. Drawing up a report plan, distribution of the collected material in the required logical sequence.
4. General acquaintance with the literature and selection of the main source among the sources.
5. Refinement of the plan, selection of material for each item of the plan.
6. Compositional design of the report.
7. Memorization, memorization of the text of the report, preparation of abstracts.
8. Presentation of a report.
9. Discussion of the report.
10. Evaluation of the report

SUMMARY - a brief analytical presentation by the student of the literature he studied on the chosen topic. This is one of the types of research work carried out on the basis of the study of sources, analysis of specific material. The abstracts use statistical collections and materials, monographs, magazine and newspaper articles, sociological research data. The work must be written in the first person, which implies the use of the following phrases in the text: "in our opinion", "from my point of view", "the author believes that ...", "I agree (or disagree)", etc., those. the student's position on the problem being covered should be clearly traced in the work. After determining the topic, you should start studying the literature. First of all, the student should familiarize himself with the available publications on the topic in order to find out the degree of its development. This and other literature is used as factual material. When studying literature, one should pay attention to fundamental theoretical issues, the most important provisions, concepts, categories, terminology, judgments, arguments, formulations, conclusions, and statistical data.

The general requirement for a scientific text, which the abstract must also meet, is completeness, depth of presentation, accuracy, brevity, originality. By completeness it is customary to understand the statement of the problem in full, containing the necessary information. The depth of presentation is the degree of penetration into the essence of a phenomenon, an idea. Under the accuracy of the text, it is customary to understand the correspondence of the author's statements to objective reality, the clarity of terminology, concepts and categories, the allocation of essential features of the analyzed phenomena or theoretical provisions. Brevity means a concise statement. This is the absence of irrelevant

facts, details, arguments, unnecessary figures, etc. Under the originality of the text is understood such a presentation of the material, which indicates the independence of the student's thoughts, judgments. The work should not be declarative, unsubstantiated provisions, "random" text. Quotations should not be overused. A quotation is appropriate only when it convincingly confirms the thought expressed by you, serves as a starting point for critical remarks on a particular issue, gives an exact formulation, or contains a scientific definition. There may be few facts, arguments in the work, but they must be accurate, vivid, and convincing.

7. Evaluation fund

7.1 Methods for monitoring and evaluating learning outcomes

In the learning process, the following assessment forms of independent work of students, assessment tools for monitoring progress and intermediate assessments are used:

1. Current control (carried out by the lecturer and the teacher leading the seminars):

- tests to check the results of independent extracurricular work of students;
- writing essays, written homework;
- holding colloquia;
- Essay writing.

2. Intermediate control: oral test (1 semester).

Evaluative means of current monitoring of progress include control questions and tasks in the form of blank and (or) computer testing, to control the development of discipline sections by students, defense of abstracts, a list of essay topics.

Samples of test tasks, essay topics, control questions and tasks for conducting current control, examination tickets are given in Appendix 2.

7.2 Scale and criteria for evaluating learning outcomes

UK-5 Able to perceive the intercultural diversity of society in the socio-historical, ethical and philosophical contexts

The list of evaluation tools for the discipline "Philosophy"

OS number	Name of the evaluation tool	Brief description of the evaluation tool	Presentation of the evaluation tool in the FOS
1	Colloquium (TO)	A means of monitoring the assimilation of the educational material of the topic, section or sections of the discipline, organized as a training session in the form of a pedagogical interview worker With students.	Questions on topics / sections of the discipline
2	Test (K/R)	A tool for testing skills to apply the acquired knowledge to solve problems of a certain type on a topic or section	A set of control tasks by options
3	Essay (R)	The product of the student's independent work, which is a summary in writing of the results of the theoretical analysis of a certain scientific (educational and research) topic, where the author reveals the essence of the problem under study, gives different points of view, as well as his own views on it.	Essay topics
4	Oral interview interview, (UO)	A means of control, organized as a special conversation between a teacher and a student on topics related to the discipline being studied, and designed to clarify the amount of knowledge of the student in a particular section, topic, problem, etc.	Questions about topics / sections of the discipline
5	Essay (Uh)	Means, which allows assessing the student's ability to express in writing the essence of the problem posed, to independently analyze this problem using concepts and analytical tools of the relevant discipline, to draw conclusions that summarize a u t h o r ' s p o s i t i o n on the given problem.	Essay topics
6	Exam tickets	The tool used for intermediate certification in the discipline "Philosophy"	Questions to prepare for the test

Task 2. What are the main directions of Russian philosophical thought of the XIX century. and their representatives.

Option 5

Task 1. Expand the difference between Slavophilism and Westernism and highlight their socio-philosophical differences.

Task 2. Explain what are the distinctive features of N.G. Chernyshevsky's anthropological materialism.

Option 6

Task 1. Expand the content of the philosophical views of F.M. Dostoevsky.

Task 2. Describe the specifics of the philosophy of unity.

Option 7

Task 1. Expand the content of the philosophical views of Leo Tolstoy.

Task 2. Explain the common features and differences in the philosophy of the three directions of populism.

B)**Option 1**

Task 1. What are the main currents of Russian philosophical thought of the late XIX - early XX centuries. and give a brief description of them.

Task 2. Explain the content of the main categories of the philosophy of cosmism.

Option 2

Task 1. What is the essence of V.V. Rozanov for marriage and family?

Task 2. Compare what is common and what is different in the philosophical views of representatives of the religious idealistic philosophy of the late XIX - early XX centuries.

Option 3

Task 1. Light up the views of N.A. Berdyaev on the problem of creativity (based on the work "The Meaning of Creativity")

Task 2. Explain what is the essence of the social philosophy of V.I. Lenin

Option 4

Task 1. Expand the main content of the work of V.I. Lenin, Materialism and Empirio-Criticism.

Task 2. Expand the main problems studied by Russian philosophy in the 20-90s. XX century.

The control work performed by the student can either be credited or not credited. However, the teacher of the discipline for his own reporting evaluates the work on a 5-point scale, guided by the following criteria.

The grade "excellent" is given for the control work, in which:

1. Presented logical content.
2. The relevance of the topic under consideration is reflected, the main categories are correctly identified.
3. An analysis of the literature on the topic is given, the methodological foundations of the problem under study are identified, and issues of the history of its study in science are highlighted. Literature analysis is distinguished by depth, independence, and the ability to show one's own position in relation to the issue under study.
4. In conclusion, detailed, independent conclusions are formulated.

The mark "good" is given for the control work, in which:

1. Presented logical content.
2. The relevance of the topic is revealed, the purpose and tasks are correctly defined.

3. The range of basic literature on the topic is presented, the main concepts used in the work are highlighted. In some cases, the student cannot give a critical assessment of the views of researchers, insufficiently argues for certain provisions.
4. In conclusion, general conclusions are formulated.

The assessment of "satisfactory" is evaluated by the control work, in which;

1. Presented logical content.
2. The relevance of the topic is disclosed correctly.
3. The theoretical analysis is given descriptively, the student failed to reflect his own position in relation to the materials under consideration, a number of judgments are superficial.
4. In conclusion, general conclusions are formulated.

The assessment "unsatisfactory" evaluates the control work, in which most of the requirements for this kind of work have not been met.

43. Historical responsibility of the subjects of history.
44. Philosophical scenarios for the future.
45. Diversity of cultures and civilizations as an integral part of the modern world community.

One of the types of independent work of students is writing a creative work on a given topic or agreed with the teacher. A creative work (essay) is an original work of up to 10 pages of text (up to 3000 words) devoted to any significant classical or modern philosophical problem. A creative work is not an abstract and should not be descriptive, a large place in it should be given to a reasoned presentation of one's point of view, a critical assessment of the material and issues under consideration, which should contribute to the disclosure of creative and analytical abilities.

The overall score is based on the following parameters:

1. Correspondence of the text of the essay to the chosen topic
2. Philosophical understanding of the chosen topic
3. Persuasiveness of the arguments presented
4. Consistency, consistency, consistency of presentation
5. Originality of the essay

Those special knowledge of philosophical texts is not necessary (although some knowledge of the history of philosophy and an understanding of the peculiarities of philosophical thinking and problem posing, of course, is welcome). It is more important to understand the essence of the problems, the ability to reason, to give correct arguments

- the grade "excellent" is given to the student if all the criteria for all indicators are implemented;
- a "good" grade is assigned to a student if there is no implementation of several or all indicators according to the 4th and 5th criteria;
- the grade "satisfactory" is given to the student if there is no implementation of several or all indicators according to the 3rd, 4th and 5th criteria;
- an "unsatisfactory" grade is given to a student if there is no implementation of several or all indicators according to all criteria;

7.3.2. Intermediate certification

Form of intermediate certification: test

Intermediate certification of students in the form of an exam is carried out based on the results of all types of educational work provided for by the curriculum for a given discipline (module), while taking into account the results of current monitoring of progress during the semester. The assessment of the degree of achievement by students of the planned learning outcomes in the discipline (module) is carried out by the teacher conducting classes in the discipline(module) by the method of expert assessment. Based on the results of the intermediate certification for the discipline (module), the mark "passed" or "failed" is given.

Only students who have completed all types of educational work provided for by the work program in the discipline "Philosophy" are allowed to intermediate certification
