### 3.3. Contents of the discipline

#### **Topic 1. The essence of the concept of “business process”.**

##### **Approaches to business process management**

The essence of the concept of “business process”. Stages of business process management. Business process relationships. Approaches to business process management.

#### **Topic 2. Classification of business processes**

Basic business processes. Supporting business processes. Business management processes. List of business management processes. Characteristics of business processes.

#### **Topic 3. Efficiency: essence and criteria.**

An analysis of private economic efficiency, socio-economic efficiency of organization management.

Indicators of the successful performance of the organization.

Seminar 1. Productivity indicators: enterprise profit, unit price, labor productivity, staff turnover, wages, social costs, investments in technology upgrades, losses in crisis situations (determining the organization’s resistance to changes in sales markets).

Seminar 2. Assessing the effectiveness of organizations based on correlating productivity indicators and invested resources at different stages of the technological cycle.

#### **Topic 4. Analysis of the control system.**

Principles, methods and essence of management system analysis.

Peculiarities analysis of organizational page at culture at board, elements of the management system and the management process.

Seminar 3. Theoretical and methodological foundations of control systems research.

Seminar 4. Study of management functions, structures and processes. Topic

5. Assessment of management effectiveness.

Targeted, systemic, multi-parameter approach. Types of assessment. Seminar

5. Efficiency of labor of a managerial employee.

Labor efficiency of the management apparatus, its individual bodies and divisions. Efficiency of the management process; efficiency of the management system.

**Topic 6. Efficiency of public administration.** Efficiency of government and

public service.

Effectiveness of government policies and programs. Performance-based management in the public sector: opportunities and limitations.

Seminar 6. Measuring the effectiveness of public administration. State management of the economy and social sphere Topic 13.1. State economic management. State management of the social sphere

**Topic 7. Efficiency of rule-making activities of the state.**

Measures to improve the quality of new and existing regulations.

Seminar 7. Criteria for assessing regulations: general, sectoral and specific. Financial and economic indicators of the effectiveness of regulations.

**Topic 8. Organizational development: management effectiveness and system of methods.**

Methods for increasing the efficiency of organization management. Methods of organizational development.

Seminar 8. Main stages of development and implementation of an organizational development program

**Topic 9. Basic levels of intervention and methods of organizational development.**

**3.4. Topics of reports in the discipline “Management and assessment of the effectiveness of business processes”**

**(formation of competence PC-4)**

1. Efficiency rating management activity and professionalism
2. Management based on the results: analysis and evaluation
3. Management changes: innovation
4. Regulatory reform in Russia: analysis and evaluation of effectiveness
5. An analysis and assessment of the effectiveness of government decisions
6. Effectiveness of public administration in the region
7. Multiaspectivity and dynamicity assessments Effect and management
8. Effectiveness Integrity of the public service: analysis and assessment
9. An analysis and risk management
10. An analysis and evaluation of government programs
11. Effectiveness The essence of rule-making activities of the state
12. Organizational development and the problem of bureaucracy
14. Effectiveness management and multidimensional intervention
15. Page at cultural changes and management efficiency
16. Total at quality management: analysis and evaluation
17. Management lack of efficiency in the public sector
18. Efficiency rating management activity and strategic behavior
19. Mechanist and logical management model and organizational effectiveness
20. De this centralization of management: analysis and evaluation of

effectiveness

### **5. Material and technical support of discipline.**

Auditoriums for lectures and seminars of the general fund: educational tables with benches, a blackboard, a portable multimedia complex (projector, projection screen, laptop). Teacher's workplace: table, chair.

### **6. Methodological recommendations**

#### **6.1. Methodological recommendations for teachers on organizing training.**

Current control (carried out by the lecturer and teacher): correctness of answers to questions on the topics covered; assessment of existing opinions and approaches to solving specific problems; essay preparation; intermediate testing in individual sections of the discipline.

When performing routine monitoring, it is possible to use test material. Samples of control questions and tasks for conducting ongoing monitoring are given in the appendix. When implementing a bachelor's degree program, an organization has the right to use e-learning and distance learning technologies. All materials are posted in the Moscow Polytechnic Library.

When training people with disabilities, e-learning and distance educational technologies must provide for the possibility of receiving and transmitting

information in forms accessible to them.

## **6.2. Guidelines for students on mastering the discipline.**

Lecture is a systematic, consistent, monologue presentation by the teacher of educational material, usually theoretical character. When preparing a lecture, the teacher is guided by the work program of the discipline. During lectures, it is recommended to take notes, which will allow you to later recall the studied educational material and supplement the content when working independently with literature.

You should also pay attention to categories, formulations that reveal the content of certain phenomena and processes, scientific conclusions and practical recommendations, positive experience in public speaking. It is advisable to leave margins in your working notes in which to make notes from the recommended literature, supplementing the material of the lecture you listened to, as well as emphasizing the special importance of certain theoretical positions.

Conclusions from the lecture summarize the teacher's thoughts on educational issues. The teacher provides a list of used and recommended sources for studying a specific topic. At the end of the lecture, students have the opportunity to ask questions to the teacher about the topic of the lecture. When delivering lectures on the discipline, electronic multimedia presentations can be used.

### **Methodological instructions for students when working at the seminar.**

Seminars are implemented in accordance with the working curriculum with consistent study of discipline topics. In preparation for the seminars, the student is recommended to study the basic literature, familiarize himself with additional literature, new publications in periodicals: magazines, newspapers, etc. In this case, you should take into account the recommendations of the teacher and the requirements of the curriculum. It is also recommended to finalize your lecture notes by making appropriate notes from the literature recommended by the teacher and provided for by the curriculum. Abstracts should be prepared for presentations on all educational issues brought up for the seminar.

Since the student's activity in seminar classes is the subject of monitoring his progress in mastering the course, preparation for seminar classes requires a responsible attitude. During interactive classes, students must be active.

### **Methodical instructions for students by organizing independent work.**

Independent work of students is aimed at independent study of a separate topic of the academic discipline. Independent work is mandatory for each student, its volume is determined by the curriculum. When working independently, the student interacts with the recommended materials with the participation of the teacher in the form of consultations. The electronic library system (electronic library) of the university provides the possibility of individual access for each student from any point where there is access to the Internet.

At onlIchi aboutatexpectant from hisla persons With OGlimited health capabilities, they will be provided with printed and (or) electronic educational resources in forms adapted to restrictions on their health.

### **Guidelines for making presentations.** Presentation (from the English word -

presentation) is a set of color pictures-slides on a specific topic, which is stored in a special format file with the PP extension. The term "presentation" (sometimes they say, "slide film") is associated primarily with the information and advertising functions of pictures, which are designed for a certain category of viewers (users).

Multimedia computer presentation is:

- dynamic synthesis of text, image, sound;
- the most modern software interface technologies;
- interactive contact between the speaker and the demonstration material;
- mobility and compactness of information media and equipment;
- ability to update, supplement and adapt information;
- low cost.

Rules for designing computer presentations  
General design rules

Many designers claim that there are no laws or rules in design. There are tips, tricks, tricks. Design, like any kind of creativity, art, like any way of some people communicating with others, like a language, like a thought, will bypass any rules and laws.

However, there are certain guidelines that should be followed, at least for novice designers, until they feel the strength and confidence to create their own rules and guidelines.

Font design rules:

- Serif fonts are easier to read than sans serif fonts;
- It is not recommended to use capital letters for body text.
- Font contrast can be created through: font size, font weight, style, shape, direction and color.
- Rules for choosing colors.
- The color scheme should consist of no more than two or three colors.
- There are incompatible color combinations.
- Black color has a negative (gloomy) connotation.
- White text on a black background is hard to read (inversion is hard to read).

Presentation Design Guidelines

To ensure that the presentation is well received by the audience and does not evoke negative emotions (subconscious or fully conscious), it is necessary to follow the rules of its registration.

A presentation involves a combination of information of various types: text, graphics, music and sound effects, animation and video clips. Therefore, it is necessary to take into account the specifics combining pieces of information of different types. In addition, the design and display of each of the listed types of information is also subject to certain rules. So, for example, the choice of font is important for textual information, brightness and color saturation are important for graphic information, and optimal relative position on the slide is necessary for the best possible perception of them together.

Let's consider recommendations for the design and presentation of various types of materials on the screen.

Formatting text information:

- • Rfont size: 24–54 points (heading), 18–36 points (plain text);
  - • tsThe font color and background color should contrast (the text should be easy to read), but not hurt the eyes;
  - • font type: for the main text a smooth sans-serif font (Arial, Tahoma, Verdana), for the title you can use a decorative font if it is easy to read;
  - • Italics, underlining, bold font, and capital letters are recommended to be used only for semantic highlighting of a text fragment.
- Design of graphic information:
    - • Rdrawings, photographs, diagrams are designed to supplement textual information or convey it in a more visual form;
    - • It is advisable to avoid drawings in the presentation that do not carry a semantic load, if they are not part of the style;
    - • tsThe color of graphic images should not sharply contrast with the overall style of the slide;
    - • illustrations are recommended to be accompanied by explanatory text;• if a graphic image is used as a background, then text against this background it should be clearly readable.
    - Contents and arrangement of information blocks on the slide:• Andthere should not be too many information blocks (3-6);
    - • RThe recommended size of one information block is no more than 1/2 the size of the slide;
    - • It is desirable to have blocks with different types of information on the page (text, graphs, diagrams, tables, pictures) that complement each other;
    - • Key words in the information block must be highlighted;
    - • AndIt is better to place information blocks horizontally, blocks related in meaning - from left to right;
    - • nThe most important information should be placed in the center of the slide;
    - • the logic for presenting information on slides and in a presentation should correspond to the logic of its presentation.

In addition to the correct arrangement of text blocks, we must not forget about their content - the text. In no case should it contain spelling errors. You should also take into account the general rules of text formatting.

ByAfter creating a presentation and its design, you need to rehearse its presentation and your speech, check how the presentation as a whole will look (on a computer screen or projection screen), how quickly and adequately it is perceived from different places in the audience, under different lighting, noise, in an environment as close as possible to real performance conditions.

### 7.1. Methods for monitoring and assessing learning outcomes

In the process of mastering this discipline, the student develops and demonstrates the following competencies:

### 7.2. Scale and criteria for assessing learning outcomes

In the process of mastering the educational program, competencies, including their individual components, are formed step by step in the course of mastering students of disciplines (modules), practices in accordance with the curriculum and calendar schedule of the educational process.

By the indicator for assessing competencies at various stages of their formation is the achievement by students of the planned learning outcomes in the discipline (module).

PC-4. Able to prepare for implementation, monitor parameters and assess the success of cl in the organization

***Interim certification form: test.***

AND Commercial certification of students in the form of a test is carried out based on the results of completing all types of academic work provided for by the curriculum for a given discipline (module), while taking into account the results of ongoing monitoring of progress during the semester. Assessment of the degree to which students have achieved the planned learning outcomes in the discipline (module) is carried out by the teacher leading classes in the discipline (module) using the method of expert assessment. Based on the results of the intermediate certification for the discipline (module), a grade of “pass” or “fail” is assigned.

Only students who have completed all types of academic work provided

for by the work program in the discipline “Sales and Customer Relationship Management” are allowed to take the final certification.

<i>Grading scale</i>	<i>Description</i>
Passed	All types of educational work provided for by the curriculum have been completed. The student demonstrates compliance with the knowledge at menius, skillOV privedaytime V TAbnitz of indicators, Ohandles acquired knowledge, skills, abilities, and applies them in situations of increased complexity. In this case, minor errors, inaccuracies, costatdaysPRand analytical operations, transfer knowledge And&changes to new, non-standard situations.
Nit is accepted	None or more types of educational work provided for by the curriculum have not been completed. The student demonstrates incomplete compliance of knowledge, abilities, skills with those given in the tables of indicators, significant mistakes are made, a lack of knowledge, abilities, skills is manifested in a number of indicators, the student experiences significant difficulties in operating knowledge and skills when transferring them to new situations.

### **7.3. Evaluation tools for the discipline “Management and assessment of the effectiveness of business processes”**

No .OS	Name of the assessment tool	Brief description of the evaluation tool	Submission of the assessment tool to the Federal
1	Report, message (DS)	The product of the student’s independent work, which is pubpersonal presentation to present the results obtained in solving a specific educational, practical, educational, research or scientific topic	Topics of reports, messages
2	Test (T)	A system of standardized tasks that allows you to automate the procedure for measuring the level of knowledge and skills of a student.	Test task fund
3	Test (W)	Final form of knowledge assessment. In higher education institutions they are held during examination sessions.	Test questions for testing

### 7.3.1. Current control

#### **Topics of reports in the discipline “Management and assessment of the effectiveness of business processes”**

##### **(formation of competence PC-4)**

1. Assessment of management effectiveness and professionalism
2. Management by results: analysis and evaluation
3. Change Management: Innovation
4. Regulatory reform in Russia: analysis and evaluation of effectiveness
5. Analysis and assessment of the effectiveness of government decisions
6. Efficiency of public administration in the region
7. Multidimensionality and dynamism of management effectiveness assessment
8. Efficiency of the civil service: analysis and assessment
9. Risk analysis and management
10. Analysis and evaluation of government programs
- eleven. Efficiency of the state's rule-making activities
12. Organizational development and the problem of bureaucracy
13. Management Effectiveness and Multidimensional Intervention
14. Structural changes and management effectiveness
15. Total quality management: analysis and evaluation
16. Performance Management in the Public Sector
17. Management performance assessment and strategic behavior
