1. Goals, objectives and planned learning outcomes in the discipline

The goal of mastering the discipline “Entrepreneurship” is to develop in students a holistic system of thinking, knowledge and skills in the content, organization of entrepreneurial activity, its functions, types, characteristics of the external and internal environment of entrepreneurial activity, organizational and legal forms of enterprises (organizations), business planning, stages of business creation and registration, risks and ethics in entrepreneurship.

The main objectives of mastering the discipline “Entrepreneurship” include:

- equip students with knowledge in the field of entrepreneurial activity;
- give an idea of the basic laws governing business activities;
- master the features of the external and internal business environment;
- teach how to draw up business plans;
- reveal the essence of the occurrence and calculation of risks of entrepreneurial activity.

Training in the discipline “Entrepreneurship” is aimed at developing the following competencies in students:

Code and name of competencies	Indicators of Competency Achievement
OPK - 4. Able to identify and evaluate new market opportunities, develop business plans for the creation and development of new activities and organizations	IOPK-4.1. Knows methods for identifying and assessing new market opportunities, developing business plans for creating and developing new areas of activity for organizations. IOPK-4.2. Able to identify and evaluate new market opportunities, develop business plans for the creation and development of new areas of activity of organizations. IOPK-4.3. Possesses the skills and methods of identifying and assessing new market opportunities, developing business plans for the creation and development of new areas of activity of organizations.

2. Place of discipline in the structure of the educational program

The discipline belongs to the mandatory part of block B1 “Disciplines (modules)”.

The discipline “Entrepreneurship” is logically, substantively and methodologically interconnected with the following disciplines and practices of the EP:

- Quality management
- Process management
- Self-management and time management
- Strategic management
- Small Business Management

3. Structure and content of the discipline

The total labor intensity of the discipline is 6 credit units (216 hours).

3.1 Types of educational work and labor intensity

(according to forms of study)

3.1.1. Part-time education

No.	Type of educational work	Quantity hours	Semesters	
			3	4
1	Auditory lessons	72	36	36
	Including:

	Total		36	36			144

3.3 Contents of the discipline

Topic 1. Concept and goals of entrepreneurship

The essence of entrepreneurship. Signs, functions and goals of entrepreneurial activity. Internal and external environment of entrepreneurship. Subjects and objects of entrepreneurial activity.

Topic 2. Types of business activities

Production business activity. Commercial entrepreneurial activity. Financial, consulting and auditing and innovative business activities

Topic 3. Organization of business activities

Selecting an entrepreneurial idea. Features of justification for an entrepreneurial project. Organization of a new enterprise.

Topic 4. Registration of business activities

Features of state registration of business activities. Legislative regulation of the status of a legal entity. State registration of an enterprise. Licensing of business activities

Topic 5. Business planning and management

Business planning. Basic principles of planning. Basic requirements for a business plan.

Topic 6. State support for entrepreneurship

The need for state regulation of business activities. Methods of government regulation. Forms of state support for business in Russia.

Topic 7. Innovation in entrepreneurship

Features of innovative entrepreneurial activity. Principles of state support for innovation activities. Specifics of the implementation of innovative projects in the Russian Federation.

Topic 8. Problems of entrepreneurship

Financing of business activities. Problems of legal support for entrepreneurial activity. Marketing problems of entrepreneurial activity.

Topic 9. Risks in entrepreneurship

The essence and types of business risks. Methods for taking into account risks in innovative entrepreneurship.

3.4 Topics of seminars/practical and laboratory classes**3.4.1. Seminars/practical sessions**

Topic 1. Concept and goals of entrepreneurship	Seminar session 1
Topic 2. Types of business activities	Seminar session 2
Topic 3. Organization of business activities	Seminar session 3
Topic 4. Registration of business activities	Seminar session 4
Topic 5. Business planning and management	Seminar session 5
Topic 6. State support for entrepreneurship	Seminar session 6
Topic 7. Innovation in entrepreneurship	Seminar session 7
Topic 8. Problems of entrepreneurship	Seminar session 8
Topic 9. Risks in entrepreneurship	Seminar session 9

4. Educational, methodological and information support**4.1 Main literature**

4.3 Electronic educational resources

1. An electronic educational resource on the discipline is under development.

5. Logistics support

Auditorium for lectures and seminars of the general fund. Study tables with benches, a blackboard, a portable multimedia complex (projector, projection screen, laptop). Teacher's workplace: table, chair.

6. Guidelines

6.1 Methodological recommendations for teachers on organizing training

A presentation (from the English word - presentation) is a set of color pictures-slides on a specific topic, which is stored in a special format file with the PP extension. The term “presentation” (sometimes called “slide film”) is associated primarily with the information and advertising functions of pictures, which are designed for a certain category of viewers (users).

In order for the presentation to be well received by the audience and not cause negative emotions (subconscious or fully conscious), it is necessary to follow the rules of its design.

A presentation involves a combination of information of various types: text, graphics, music and sound effects, animation and video clips. Therefore, it is necessary to take into account the specifics of combining pieces of information of different types. In addition, the design and display of each of the listed types of information is also subject to certain rules. So, for example, the choice of font is important for textual information, brightness and color saturation are important for graphic information, and optimal relative position on the slide is necessary for the best possible perception of them together.

In addition to the correct arrangement of text blocks, we must not forget about their content - the text. Under no circumstances should it contain spelling errors. You should also take into account the general rules of text formatting.

After creating a presentation and its design, you need to rehearse its presentation and your speech, check how the presentation as a whole will look (on a computer screen or projection screen), how quickly and adequately it is perceived from different places in the audience, under different lighting, noise, in an environment as close as possible to real performance conditions.

6.2 Guidelines for students on mastering the discipline

A lecture is a systematic, consistent, monologue presentation by a teacher of educational material, usually of a theoretical nature. When preparing a lecture, the teacher is guided by the work

program of the discipline. During lectures, it is recommended to take notes, which will allow you to subsequently recall the studied educational material, supplement the content when working independently with literature, and prepare for the exam.

You should also pay attention to categories, formulations that reveal the content of certain phenomena and processes, scientific conclusions and practical recommendations, positive experience in oratory. It is advisable to leave margins in your working notes in which to make notes from the recommended literature, supplementing the material of the lecture you listened to, as well as emphasizing the special importance of certain theoretical positions.

Conclusions from the lecture summarize the teacher's thoughts on educational issues. The teacher provides a list of used and recommended sources for studying a specific topic. At the end of the lecture, students have the opportunity to ask questions to the teacher about the topic of the lecture. When delivering lectures on the discipline, electronic multimedia presentations can be used.

Guidelines for students when working at the seminar

Seminars are implemented in accordance with the working curriculum with sequential study of the topics of the discipline. In preparation for the seminars, the student is recommended to study the basic literature, familiarize himself with additional literature, new publications in periodicals: magazines, newspapers, etc. In this case, you should take into account the recommendations of the teacher and the requirements of the curriculum. It is also recommended to finalize your lecture notes by making appropriate notes from the literature recommended by the teacher and provided for by the curriculum. Abstracts should be prepared for presentations on all educational issues brought up for the seminar.

Since the student's activity in seminar classes is the subject of monitoring his progress in mastering the course, preparation for seminar classes requires a responsible attitude. During interactive classes, students must be active.

Guidelines for students on organizing independent work

Independent work of students is aimed at independent study of a separate topic of the academic discipline. Independent work is mandatory for each student, its volume is determined by the curriculum. When working independently, the student interacts with the recommended materials with the participation of the teacher in the form of consultations. To perform independent work, methodological support is provided. The electronic library system (electronic library) of the university provides the possibility of individual access for each student from any point where there is access to the Internet.

7.2 Scale and criteria for assessing learning outcomes

Form of intermediate certification in the third semester: test.

Interim certification of students in the form of a test is carried out based on the results of completing all types of academic work provided for by the curriculum for a given discipline (module), while taking into account the results of ongoing monitoring of progress during the semester. Assessment of the degree to which students have achieved the planned learning outcomes in the discipline (module) is carried out by the teacher leading classes in the discipline (module) using the method of expert assessment. Based on the results of the interim assessment, the student is given a “pass” or “fail” rating.

Only students who have completed all types of academic work provided for by the work program in the discipline “Entrepreneurship” are allowed to take the intermediate certification (passed the intermediate control)

Grading scale	Description
Passed	All types of educational work provided for by the curriculum have been completed. The student demonstrates compliance with the knowledge, skills and abilities given in the tables of indicators, operates with acquired knowledge, skills and abilities, and applies them in situations of increased complexity. In this case, minor errors, inaccuracies, and difficulties during analytical operations and the transfer of knowledge and skills to new, non-standard situations may be made.
Not accepted	One or more types of educational work provided for by the curriculum have not been completed. The student demonstrates incomplete compliance of knowledge, abilities, and skills with those given in the tables of indicators; significant mistakes are made; a lack of knowledge, abilities, and skills is evident in a number of indicators; the student experiences significant difficulties in operating knowledge and skills when transferring them to new situations.

Form of intermediate certification in the fourth semester: exam.

Interim certification of students in the form of an exam is carried out based on the results of completing all types of academic work provided for by the curriculum for a given discipline (module), while taking into account the results of ongoing monitoring of progress during the semester. Assessment of the degree to which students have achieved the planned learning outcomes in the discipline (module) is carried out by the teacher leading classes in the discipline (module) using the method of expert assessment. Based on the results of the intermediate certification for the discipline (module), a grade of “excellent”, “good”, “satisfactory” or “unsatisfactory” is given.

Only students who have completed all types of academic work provided for by the work program in the discipline “Entrepreneurship” are allowed to take the intermediate certification (passed the intermediate control)

Grading scale	Description
Great	an “excellent” grade is given to a student if he has deeply and firmly mastered the program material of the course, presents it comprehensively, consistently, clearly and logically, is able to closely connect theory with practice, copes freely with assignments and questions, and does not have difficulty answering when assignments are modified , correctly substantiates decisions made, has versatile skills and techniques for performing practical tasks;
Fine	a “good” grade is given to a student if he firmly knows the course material, presents it competently and to the point, without allowing significant inaccuracies in answering the question, correctly applies theoretical principles when solving practical issues and problems, and has the necessary skills and techniques for their implementation;
Satisfactorily	a “satisfactory” grade is given to a student if he has knowledge only of the basic material, but has not mastered its details, allows inaccuracies, insufficiently correct formulations, and violations of the logical sequence in presentation of program material, has difficulty performing practical tasks;
Unsatisfactory	An “unsatisfactory” grade is given to a student who does not know a significant part of the program material, makes significant mistakes, is uncertain, solves practical problems with great difficulty, or cannot cope with them independently.

7.3 Evaluation tools

**List of assessment tools for the discipline
"Entrepreneurship"**

OS No.	Name of the assessment tool	Brief description of the evaluation tool	Submission of the assessment tool to the Federal Fund

Report evaluation criteria

No.	Criterion	Grade			
		ex.	chorus	satisfaction	unsatisfactory

1	Structure of the report	The report contains semantic parts balanced in volume	The report contains three semantic parts, unbalanced in volume	One of the semantic parts is missing from the report	The report does not show the presence of semantic parts
2	Contents of the report	The content reflects the essence of the problem under consideration and the main results obtained	The content does not fully reflect the essence of the problem under consideration or the main results obtained	The content does not fully reflect the essence of the problem under consideration and the main results obtained	The content does not reflect the essence of the problem under consideration or the main results obtained
3	Mastery of the material	The student has complete command of the material presented, is problem oriented, and answers questions freely	The student knows the material presented, is oriented in the problem, finds it difficult to answer some questions	The student is not fluent enough in the material being presented and is poorly oriented in the problem	The student does not know the material being presented and has poor understanding of the problem
4	Matching theme	The presented material fully corresponds to the stated topic	The presented material contains elements that are not relevant to the topic	The material presented contains a large number of elements that are not related to the topic.	The material presented is slightly relevant to the topic

Discipline test
"Entrepreneurship"
(formation of OPK-4 competence)

What does not apply to the principle of free choice of activity?

- A) development of an activity plan
- B) setting prices for products and services
- C) payments for obligations to employees
- D) disposal of profits

ANSWER: C

What are the elements of the external business environment?

- A) production areas
- B) control system
- C) marketing program
- D) legislative framework

ANSWER:D

What are the principles of entrepreneurial activity?

- A) increasing workers' incomes
- B) maintaining competition and limiting monopoly
- C) assessment of the market situation

D) disposal of profits

ANSWER:B

What is the main advantage of management consulting?

A) development of pricing policy

B) formation of a mechanism for managing competition

C) regulation of trade operations

D) effective methods of strategic planning

ANSWER:D

What types of consulting firms are there?

A) small multifunctional

B) providing special technical services

C) medium multifunction

D) large highly specialized

ANSWER:B

What activities are not included in consulting projects?

A) analytical and research activities

B) appraisal activities

C) rental and leasing operations

D) forecasting

ANSWER: C

What happens as production volumes increase?

A) decrease in production profitability

B) an increase in gross unit costs.

C) regulation of trade operations

D) reduction in gross unit costs

ANSWER:D

What is not required to organize a new enterprise?

A) financial resources

B) leasing operations

C) non-residential premises

D) qualified founders

ANSWER:B

What is the main task of the first stage of organizing an enterprise?

A) developing a business plan

B) setting strategic and tactical goals of the enterprise

C) justification for the entrepreneurial idea

D) choice of legal form of the enterprise

ANSWER: C

On what basis can the authorized capital not be increased?

A) in case of lack of working capital

B) licensing requirements

C) the emergence of new participants

D) agreement

ANSWER:D

What is a license?

A) permission to reorganize a legal entity

B) permission to carry out a specific type of activity

C) permission to enter information into the state register

D) permission to liquidate a legal entity

ANSWER:B

The license is valid for a period of at least:

- A) two years
- B) three years
- C) five years
- D) ten years

ANSWER: C

Business planning does not provide the organization with:

- A) improving management efficiency
- B) no risks
- C) coordinating the actions of employees at different levels
- D) improving the level of customer service
- E) strengthening control over the implementation of planned plans

ANSWER: B

How is it possible to take into account changes in environmental factors?

- A) choice of legal form
- B) determining the overall economic goal
- C) adjusting the business plan
- D) an increase in the amount of financial resources

ANSWER: C

The sales forecast is considered the basis for justifying:

- A) reorganization of a legal entity
- B) licensing requirements
- C) analysis of socio-economic processes
- D) sales plan

ANSWER: D

Which enterprises primarily benefit from state production and technical support?

- A) producing consumer goods
- B) producing agricultural products
- C) implementing high-tech projects
- D) selling construction materials

ANSWER: C

Why is the Investment Tax Credit (ITC) not issued?

- A) carrying out R&D
- B) coordinating the actions of employees at different levels
- C) implementation of socially significant projects
- D) technical modernization of production
- E) implementation activities

ANSWER: B

Which organizations do not include consulting centers?

- A) industrial associations
- B) technology parks
- C) tax authorities
- D) regional governments

ANSWER: C

Which enterprises primarily benefit from state production and technical support?

- A) producing consumer goods
- B) producing agricultural products
- C) implementing high-tech projects
- D) selling construction materials

ANSWER: C

What happens at the second stage of assessing the competitiveness of innovative products?

- A) all levels are summed up for all parameters

- B) technical and operational parameters are ranked
- C) technical and operational parameters are compared
- D) an ideal product model is created

ANSWER: B

What is internal venture based on?

- A) on the creation of a new legal entity by an enterprise
- B) on the creation of technology parks
- C) on the creation of a department for innovation implementation within the enterprise
- D) on creating a business incubator

ANSWER: C

The most suitable offline promotion method can be considered:

- A) advertising in print media
- B) banners in large stores
- C) exhibition
- D) television and radio advertising

ANSWER: C

Why are offline exhibitions used less than online exhibitions?

- A) due to the participation of a large number of companies
- B) participation in them costs almost twice as much
- C) no need for an expensive stand
- D) Samples can be provided to visitors as gifts

ANSWER: B

What does not determine the specifics of Internet marketing?

- A) interactivity
- B) high level of personalization
- C) personal meetings with consumers
- D) huge market coverage

ANSWER: C

The following cash flows are not considered for the target startup:

- A) optimistic
- B) most likely
- C) systemic
- D) pessimistic

ANSWER: C

A more complex modification of the scripting method becomes:

- A) summation of all parameters
- B) building a network diagram
- C) comparison of technical and operational parameters
- D) creating an ideal product model

ANSWER: B

The reservation method does not include the following steps:

- A) identification of basic risk factors
- B) selection of measures to eliminate risk factors
- C) setting a discount rate based on profitability
- D) determining the amount of funds to eliminate the risk

ANSWER: C
