1. Goals and objectives and planned learning outcomes in the discipline

The main goals of mastering the “Foreign Language” discipline include:

comprehensive development of students’ communication skills formed at previous levels of education, necessary for effective everyday and professional communication, as well as introducing students to digital tools that both contribute to the formation of the necessary foreign language communicative competencies and facilitate oral and written interaction with foreign colleagues.

The main objectives of mastering the “Foreign Language” discipline include:

- mastering the necessary minimum vocabulary for communication for everyday and professional purposes;
- development of skills in the correct use of grammatical structures that ensure communication without distortion of meaning;
- development of the ability to perceive foreign speech by ear both in real life and in the form of video lectures and videos on the Internet;
- development of skills in reading and understanding professional and scientific literature in a foreign language in your field of study;
- development of the ability to competently express one’s thoughts orally and in writing;
- development of the skill of using digital tools to develop the necessary foreign language communicative competencies (online explanatory and bilingual dictionaries, tools for translating texts, correcting written speech, memorizing new words)
- formation of adequate speech behavior in everyday and professionally oriented situations;
- formation and development of independent work skills (working with foreign language sources, searching and analyzing necessary information, critical thinking), including with the use of digital tools (for example: Google documents, services for creating presentations, etc.).

Training in the discipline “Foreign Language” is aimed at developing the following competencies in students:

Code and name of competencies	Indicators of Competency Achievement
UK-4: ability to carry out business communication in oral and written forms in the state language of the Russian Federation and a foreign language	IUK-4.1. Takes into account the features of business communication in state and foreign languages, depending on the features of verbal and non-verbal means of communication IUK-4.2. Able to exchange business information in oral and written forms in the state and foreign languages, taking into account the unique style of official and informal letters, as well as sociocultural differences in the format of correspondence IUK-4.3. Translates professional texts from a foreign language into the state language of the Russian Federation and from the state language of the Russian Federation into a foreign language

2. Place of discipline in the structure of the educational program

This course is included in the list of mandatory parts/parts formed by participants in educational relations of block B1 “Disciplines (modules)”. The discipline “Foreign Language” is logically, substantively and methodologically connected with other humanities disciplines in the curriculum, aimed at broadening horizons, forming a humanistic worldview and developing communication skills, as well as with information technologies, which are aimed at developing the digital consciousness of students.

6. Methodological recommendations

6.1. Methodological recommendations for teachers on organizing training

“Foreign language” is one of the basic disciplines of any curriculum. In the modern world, without knowledge of a foreign language it is impossible to talk about comprehensive training of future engineers. The main course of this program is designed for students who have previously studied English. The leading goal of this course is to develop students’ foreign language professional and communicative competence in everyday and professional communication. Since in the educational space the discipline “Foreign Language” belongs to the block of humanities disciplines, it is important in shaping the sociocultural image of a modern competitive specialist.

The structure of the course is designed taking into account a consistent movement from simple to complex, from general vocabulary to more professionally oriented ones, which allows for a consistent transition from general to professional language. This work program is based on a combination of teaching principles such as linearity and modularity, fundamentality and pragmatism, and focus on the student’s personality.

The course consists of two blocks: practical exercises and independent work of students, which devotes a significant part of the training hours. Practical classes should be structured in such a way that the lexical and grammatical material studied and consolidated during the exercises necessarily finds a way out in the production of students’ own statements in oral and written speech. It is for this purpose that each substantive section of the discipline includes parts “Speaking” and “Writing”, the purpose of which is to introduce and consolidate a certain thematic block of lexical and grammatical structures and create small oral and written messages on a given topic in accordance with what is being studied at a given time. moment section.

The purpose of students’ independent work is, first of all, to develop the skills necessary in their future professional life, such as self-learning and self-development skills and group work skills.

Successful mastery of the developed foreign language program should develop in students knowledge of business terminology, the ability to prepare presentations and write essays, independent work skills to search and analyze the required information, thereby preparing a solid foundation for mastering professional foreign language terminology and developing foreign language professional communication skills in the next semesters of study.

6.2 Guidelines for students on mastering the discipline

The training program in the discipline "Foreign Language" has the following features:

- division of the training program into a foreign language for everyday communication (1st and 2nd semesters) and professionally oriented (3rd - 6th semesters) blocks,

- highlighting independent work as an autonomous type of student work, which is assessed separately and has a professionally oriented nature,
- use of a point-rating system as a basis for assessing students' knowledge and skills and issuing a final grade at the end of each semester.

The discipline "Foreign languages" is studied by students for 6 semesters. This means that from the very first semester, students must correctly structure their work to improve their level of proficiency in a foreign language: work on new vocabulary on the topics being studied, carefully read the proposed texts, paying attention to new words and the use of different grammatical structures, actively participate in group discussions and forms of work in the classroom, independently create related oral and written texts on the topics being studied.

Within the framework of the "Foreign Language" discipline, types of independent work are organized according to the principle "from simple to complex." In the first semester, the task of independent work is to teach students to find the information requested by the teacher and make a brief reference to the main points. The result of the work is presented in the form of a presentation.

In the second semester, the objective of this activity is to develop students' critical thinking. As a task for independent work, students are asked to familiarize themselves with several sources and, after critically thinking about them, prepare a group presentation.

In the third and fourth semesters, the task of independent work is to teach students to work with graphs (pie and column charts, line graphs): read diagrams, highlight the main and minor points, describe diagrams in a foreign language. The result of the work is presented in the form of a written description of the diagrams and an oral presentation based on the use of graphs.

In the fifth and sixth semesters, independent work consists of conducting group debates in order to develop skills in argumentation and working in teams.

An indicator for assessing competence at various stages of its formation is the achievement by students of the planned learning outcomes in the discipline.

UK-4 - ability to carry out business communication in oral and written forms in the state language of the Russian Federation and a foreign language

Interim certification of students in the form of a test/exam is carried out based on the results of completing all types of educational work provided for by the curriculum for a given discipline, while taking into account the results of ongoing monitoring of progress during the semester. Assessment of the degree to which students have achieved the planned learning outcomes in the discipline is carried out by the teacher leading classes in the discipline, using the method of expert assessment. Based on the results of the intermediate certification for the discipline, a grade of pass/fail or “satisfactory”/“good”/“excellent”/“unsatisfactory” is given, depending on the form of intermediate control provided for in the curriculum.

Only students who have completed all types of academic work provided for in the work program for the discipline “Foreign Language” are allowed to take intermediate certification: completing homework, completing current tests, and performing independent work.

A point-rating system for assessing students is used.

Part-time and part-time education

The maximum number of points that a student can score based on the results of the semester is 100 points. Of these, 10 points evaluate the student’s classroom work, 40 points evaluate the result of independent work, and 50 points fall on the intermediate certification.

Classroom work: maximum 10 points

work in class (completing lexical and grammatical tasks, answering oral questions) - 10 points at the end of the semester.

Independent work: maximum 40 points

completing assignments for the course being studied, posted in LMS Moodle.

Interim assessment: maximum 50 points

- lexical and grammatical test - 25 points;
- conversation with the teacher on the topics covered - 25 points.

Table of correspondence between the points scored by the student and the assessment “passed”/“not passed” and description of results:
